Dutch: elementary  
Driving license

## Work Experience

12Build B.V – Nijverdal, The Netherlands

**Front-End Developer**, Development and success team – September 2022

(Current job)

I am working with dynamic and supportive team to build a new front-end for procurement and quotations and seamless integration platform for the largest contractures companies in the Netherlands (80% of all Dutch market). With ambition steps to grow to all European countries.

I drive with the stakeholders the best design possible in agreed time frame to create and optimise new software to conquer new markets ( i.e. Germany ).

I created workable POCs for all pages needed. and specified the requirements from back-end (processes and data structure). Then discuss them with the team and stakeholders. then build, test and release all of them. afterword collect users feedbacks to iterate and improve on the product.

ABN AMRO Bank - Amsterdam, The Netherlands

**Front-End Developer**, DC Business & wealth – Online Payments September 2018 till July 2022

I worked in one of the core teams in the bank in SCRUM way environment with 10 colleagues which we made, test and maintained: corporate credits transfer application, Payment order overview, SEPA file upload, non-SEPA file upload, Seal-bags creation, and many UI complements that they are use Bank wise like date-picker. furthermore we moved our applications from IBM CMS to Microsoft Azure Cloud following all Bank's best practises.

ABN AMRO Bank - Amsterdam, The Netherlands

**Front-End Developer Trainee**, CRM Department March,2018 till May,2018

In my traineeship at ABN AMRO, I have taught myself AngularJS and the basics of Jasmine (JavaScript testing framework) in order to be able to commit features to the internal CRM applications built and tested in these technologies. I have learned how to immerse myself into a large, existing code base. In an Agile environment, I worked together with my supervisor and a team of 7 people including business analysts, SCRUM masters, POs and 3 developers, to unify and simplify the bank internal services for the bank employees.

Mall of the Emirates— Dubai, UAE

**Sales Associate**, Store-in-charge 2007-2015

I have been employed by Al Tayer Group for over four years and have worked for various brands within the business including Loro Piana, Harvey Nichols and Dolce & Gabbana. I was positioned within the Dolce & Gabbana mono-brand store in the Mall of the Emirates where I had been promoted to Store In-Charge, managing 12 employees and building relationships with high profile clients.

# Education

RESTART NETWORK — Rotterdam, NL

## **Restart ONE program,**

It is a highly intensive programming course where I spent over 60 hours per week learning the fundamentals of full-stack web development in a guided classroom environment. We had weekly Masterclasses hosted by senior engineers from leading technology companies and every assignment was project and real world -based in a digital curriculum, e.g. recreating the front-end of Uber or Twitter. At a later stage in the program, we learned valuable leadership skills through hosting morning standups and live coding sessions for new students. Recently, I have worked on a web application for a local NGO using bootstrap and Node.JS The website is live now "<http://www.noiradacini.nl>"

## **Certificats:**

- Microsoft Certified Azure Fundamentals ( November 2019 )
- Google Web Analytic ( January 2020 )
- ITIL4 Foundation Level (December 2020)
- Official Vue developer certification (September 2023)
